SUMMARY

Highly skilled and versatile full-stack developer with 2+ years of experience in front end and back end development, combining UI/UX expertise with secure, scalable applications and deployment. Committed to solving complex problems, optimizing performance, and delivering intuitive, user-friendly solutions that enhance usability and engagement in fast-paced, collaborative environments.

SKILLS

Programming Languages and Tools

Python, JavaScript, Go, C, SQL, Docker, Git, GitHub

UI/UX Design

,Wireframing & Prototyping, User Research & Testing, User-Centered Design, Figma, Canva, Usability Testing

Databases & Cloud

MySQL, SQLite, Supabase

Soft skills

Excellent verbal communication skills, Collaboration & Teamwork, Problem Solving skills & Critical Thinking, Adaptability & Leadership, Attention to Detail, Organizational Skills, Project management skills

Front end languages and Frameworks

HTML, CSS, JavaScript, Bootstrap, Responsive Design, Web Design, SEO Optimization, React

Back end Development

Node.js, Django, RESTful APIs, GraphQL

Other Skills

AI, Blockchain(ICP, Starknet, Motoko, Cairo, Smart contracts) Cybersecurity, Low-Code & No-Code (Mendix, WordPress), Flutter, Testing, **Unit Testing, Project Management.**

PROFESSIONAL EXPERIENCE

Apprentice Software Developer

Zone 01 Kisumu &

- Developed and optimized full-stack applications using Go, JavaScript, React, SQL, and RESTful APIs, adapting to project requirements to enhance system performance, scalability, and security. Participated in code reviews to ensure clean, efficient, and maintainable code.
- Implemented Agile development practices and Scrum methodologies, leading to faster iteration cycles, improved team collaboration, and more efficient project delivery.

Front end Developer

Medinius Technology &

- **Developed and launched** a web platform using **React and Express.js**, improving usability and responsiveness.
- Designed and optimized UI/UX with Figma, enhancing accessibility and user engagement.
- **Contributed to the full software development lifecycle**, from planning and prototyping to deployment and iteration, **reducing overall development time**.

Software Developer Intern

Smart Applications International

- Designed client-facing UI/UX prototypes in Figma, contributing to an increase in user adoption.
- **Developed and integrated** a real-time customer support chat application using **Flutter**, improving response times.

04/2024 – present Kisumu, Kenya

08/2023 - 04/2024 Kisumu, Kenya

04/2023 – 08/2023 Nairobi, Kenya • Collaborated in Agile teams, following SDLC best practices to ensure efficient development, testing, and deployment of software solutions.

Freelance Software Developer

- Developed personal websites and portfolios for clients, enhancing their online presence and professional visibility.
- Built landing pages for small businesses, increasing customer engagement and client acquisitions.
- Managed hosting and deployment, ensuring websites were accessible, secure, and optimized for performance.
- Authored technical articles on computer science, software development, and emerging technologies, helping clients boost engagement on their blog sites.

09/2021 - 04/2023 Nakuru, Kenya

EDUCATION

Bsc Computer Science

Egerton University

Capstone Projects:

- Full-Stack Food Delivery App Developed for local restaurants using HTML, CSS, JavaScript, and PHP, enhancing order management and customer experience.
- **Pharmacy Management System** Built with **Django**, streamlining inventory tracking and prescription management for pharmacies and hospitals.

Certificate in Web Development

Moringa School

Technologies: HTML, CSS, JavaScript, Python, Django, Angular.

01/2019 - 05/2019 Nairobi, Kenya

09/2024 – present

09/2019 - 11/2024

Nakuru, Kenya

PROJECTS

WGET -Custom Web Scraper & Downloader (Go) ∂

Developed a Go-based WGET utility, replicating core functionalities of GNU Wget, enabling efficient file retrieval from the web. Features include:

- HTTP Request Handling Supports fetching and downloading web content.
- Error Handling & Testing Implemented robust unit tests to ensure reliability.
- **Comprehensive Documentation** Provided well-structured documentation for usability and maintenance.

Forum & 10/2024 - 10/2024

Developed a full-stack web forum using Go, HTML, CSS, and JavaScript, enabling users to create, view, and engage in discussions. Implemented:

- **User Authentication & Security** Secure login/logout with **password encryption** and session management using cookies.
- Database Management Handled data storage and retrieval using SQL databases.
- Access Control & Filtering Integrated role-based access and content filtering for a safer user experience.
- Optimized UI/UX Designed a user-friendly interface with responsive layouts and enhanced usability.

09/2024 - 12/2024

Developed a RESTful web application using Go, HTML, CSS, and JavaScript to receive, manipulate, search, and display data on music artists, concert locations, and dates. Key

- **API Integration** Fetched and processed artist data from an external API.
- Geolocation & Filtering Implemented location-based search and dynamic filters for an optimized user experience.
- Responsive UI/UX Designed an intuitive and mobile-friendly interface for seamless interaction.
